

SFCE 2019 MEETING – PARIS 24-26 JANVIER 2019

Thursday 24 of January 2019

Opening ceremony - Honorary President Bernard Dallemagne

9.00-10.30 Unedited video session on colorectal surgery

- TaTME (Cecil approach) (B. Lelong, H. Meillat)
- Robotic management of pelvic endometriosis (D. Forestier, B. Merlot)
- Low impact laparoscopic resection for rectal cancer (C. de Chaisemartin)
- Signe port right colectomy for colon cancer (J. Lefevre)

10.30-11.00 Coffee break in exhibition hall

11.00-12.00 Unedited video session on upper GI surgery

- Reversal of gastric bypass (B. Navez)
- Thoracoscopic lymphadenectomy during esophagectomy (G. Piessen)
- Robot-assisted redux Heller myotomy (A. Valverde)
- Laparoscopic Heller myotomy (C. Zaranis)

12.00-12.15 Industrial symposium

12.15-12.30 Industrial symposium

12.30-13.00 Honorary President Lecture B. Dallemagne : The future of laparoscopic surgery

13.00-14.00 Lunch break in the exhibition hall

14.00-15.00 Quiz session on Clinical Practice Guidelines

Discussion on clinical cases

- Guidelines on diverticulosis (HAS 2017) (L. Beyer-Berjot)
- Guidelines on rectal cancer (GRECCAR 2016) (Z. Lakkis)

15.00-16.00 Scientific session : Enhanced Recovery After Surgery : How do we go farther ?

- Prehabilitation (G. Passot)
- Architectural designs: Do not disconnect structures from medical practice (C. Cruvellier Kos Partners)
- Concept of Low Impact laparoscopy (N. de Angelis)
- Low impact Laparoscopy in HBP surgery (I. Dagher)

SFCE 2019 MEETING – PARIS 24-26 JANVIER 2019

16.00-16.30 Coffee break in exhibition hall

16.30-18.00 Session « Young Laparoscopic Surgeons »: How to manage difficult situations in laparoscopic surgery

- During HPB surgery (N. Garcia - E. Emungania)
- During colorectal surgery (M. Bouquot - J. Lefevre)
- During Upper GI surgery (I. El Boukili - G. Passot)

18.00-19.00 SFCE General Assembly

20.30 Gala dinner (registration required)

Friday 25 of January 2019

08.30-10.30 Unedited Video Session on HPB laparoscopic surgery

- Benign lesions in the pancreatic isthmus (S. Dokmak)
- Tumors of the posterior segment of the liver (I. Dagher)
- Laparoscopic RAMPS for left-sided pancreatic cancer (JM. Fabre)
- Low Impact Laparoscopic Cholecystectomy (N. de Angelis)

10.30-11.00 Coffee break in exhibition hall

11.00-12.00 Unedited Video Session on abdominal wall laparoscopic surgery

- Perineal reconstruction with biological mesh (S. Kirzin)
- Peristomal hernia repair (P. Hauters)
- Trans-abdominal pre-peritoneal herniorrhaphy : face-to-face
 - with robotic assistance
 - with microlaparoscopy (C. Denet)

12.00-12.15 Industrial symposium

12.15-13.00 Lecture: Narcissism, Science and Society : (Bruno Lemaitre)

13.00-14.00 Lunch break in the exhibition hall

SFCE 2019 MEETING – PARIS 24-26 JANVIER 2019

14.00-15.00 « Clubs and Associations » session

- Common bile duct stone during lap cholecystectomy (Club Coelio - C. Zaranis)
- Robotic bariatric surgery : Advises to be followed at first (Cercle Kelling - P. Blanc)
-

15.00-16.00 Scientific session co-organized with Belgian Group of Endoscopic Surgery

16.00-16.30 Coffee break in exhibition hall

16.30-17.30 Scientific session: Difficult situations in Laparoscopic colorectal surgery « How to solve the problem »

- Detection of a local carcinomatosis during lap colectomy: What to do ? (G. Passot)
- Technical issues during restorative proctocolectomy with ileo-anal anastomosis (L. Beyer-Berjot)
- Urinary injuries (ureteral, bladder, urethral) during lap colorectal surgery (P. Sebe)
- Inadequate vascular perfusion of the descending colon during colo-anal anastomosis (L. Maggiori)
- Redo lap surgery for recurrence after previous mesh rectopexy (C. Denet)

17.30-18.30 The top 5 vidéos session

SFCE 2019 MEETING – PARIS 24-26 JANVIER 2019

Saturday 26 of January 2019 – Continuing Medical Education Program

In cooperation with [FCVD](#) 09.00-12.00

Take Home messages: « What a digestive surgeon must know about genetics and oncology in 2019 »

09.00-10.20

1. Genetics

- When and why an oncogenetics consultation is required? (M. Dhooge)
- Can genetics results translate into surgical decision?
 - Example of Familial adenomatous polyposis and HNPCC (J. Lefevre)
 - Example of Neuroendocrine tumors (P. Niccoli)

2. From cytology to Biopathology

- Pathological characteristics beyond TNM staging, RAS BRAF mutation status, Tumor regression assessment) (JF. Flejou)

10.20-10.40 Coffee break

10.40-12.00

- Biomarkers: Liquid biopsy, circulating cancer cells, DNA (C. Borg)

3. Chemotherapy in 2019

- Standards of neoadjuvant chemotherapy in 2019 (E. Assenat)
- The indications of targeted therapy and immunotherapy (T. André)
